BLACK BARS FOR SLATE CREEK—C. W. Hoonaker and Press Barnes met the 10-00 express at Lexington Thursday night and received their check of black bars minnows of the creek, a distinct species he put in the hands of the State Creek. The agent complimented them on their preparations to receive the fish, saying their arrangements were better than any he had met with previously. However, the numerous applicants had diminished the supply to a few thousand than Slate Creek in last year's season.

The agent said that at the next distribution he would have a larger number of minnows than he had in the past.

Mr. Barnes went that night to put his portion in Slate from the mouth of Noyah down the creek until all were distributed. Mr. Hoonaker put his in the mouth of Mill Creek down to Col. H. Ewing's.

be fine and the shelling activity, the grain can be sown in three hours with hardly an evidence of moisture and the assurance that every grain is perfectly immune of vital success. To use a few degrees of heat than needed to kill an attached parasite seed is effort wasted. To plant a seed into quickly boiling water for ten seconds and then soil it in cold water will destroy any living thing, because the smaller seed is heated through and the vital part of the larger one is not even warmed. It is not known that a comparatively weak solution of potash will kill a potato beetle, is it fully in use in such strength as to blister the foliage. The general practice in the use of potash for the purpose is correct, but in the use of bluestone or failure to see to the late done instead of solutions much too strong—Ky. Farmer and Breeder.

MARK TWAIN BECOMES BICENTENARY—A good story of a recent conversation between Mr. Howells and Mark Twain is being the rounds. Mark Twain was relating some of his experiences before he became famous. "My difficulties were many," he said, "but I never knew whether it was worse to smoke or for an apple to devour."

**GOOD NEWS FOR  
MOTHERS AND DAUGHTERS.**

How often do we see a naturally beautiful face marred by wrinkles, blackheads, blotches and pimples, caused in many cases by ineffectiveness of the pores of the skin. These minute openings fail or are unable to perform their natural functions, hence the skin is marred.

We are pleased to say that the purest Paracramph makes the skin soft and healthy by creating a natural activity in the pores.

When applied, Paracramph opens the pores, removes the impurities, purges and purifies, and removes any inflammation, inducing perspiration. It draws out the impurities, and removes Blackheads, pimples, blotches, etc., in perfectly safe and sure manner.

If applied freely to the face twice a day, morning and night, and rubbed in

men covered with a hot towel for two or three minutes, it will not only cool and soothe but remove the troubles and insure a healthy peach bloom glow to the skin that will please even the most particular woman.

Paraphrase positively does not contain anything that will injure even the most delicate skin. It is clean, safe, cooling, soothing, application that every mother and daughter can use every day in the summer months for satisfactory results.

A trial will convince you. So get a bottle of Paraphrase to-day from your nearest dealer. If it fails to do what we claim, we will send you your drug bill, the money you paid, and get your money. We guarantee every bottle to give satisfaction.

Sold everywhere. Write for details to The Paraphrase Company, Louisville, Ky., U. S. A.
